

2014 APPLICATION FOR SEEDLING TREES

Order Deadline April 04, 2014

- 1) You must own at least two (2) acres of land.
- 2) This nursery stock must not be used in ornamental or landscaping plantings.
- 3) No plant purchased from the Sublette County Conservation District or their distributors may be resold as a living plant.
- 4) If trees ordered are not available, a refund will be issued unless a substitution is requested.

I have read and agree with the above "Conditions of Sale."

Signature & Date Required: _____ Acres of Ownership _____

Types of Plantings:

____Windbreaks/Living Snow Fence ____Reforestation ____Visual Screen Erosion Control ____ Christmas Trees ____ Other ____

The Sublette County Conservation District Tree Program

The Sublette County Conservation District Seedling Tree Program enables farmers, ranchers and other landowners to obtain trees at nominal cost. The plant stock in this program cannot be used for ornamental or landscape plantings. For that, contact your local nursery. The purpose of this program is to encourage landowners to plant effective wind barriers to protect buildings, cropland and feedlots, and for erosion control, reforestation and other conservation practices. The order form on the reverse side of this page must be completed in full and all information be legible.

Benefits of Conservation Tree Plantings

Reduce home heating and cooling costs	Increase property value
Reduce dust entering home	Reduce soil blowing
Reduce livestock feeding costs	Reduce force of wind
Increase livestock comfort, decrease stress	Beautify property
Help with snow management	Reduce noise

Prepare a Planting Plan Before You Order!

A planting plan should be prepared before trees are ordered or planted. The planting plan will show the proper location for the planting, the best species for your site, spacing between rows, spacing between trees in the row and the correct number of trees and shrubs needed. The plan will also point out requirements for proper planting to gain initial survival and how to keep trees in a vigorous growing condition.

For planting plan assistance contact the Sublette County Conservation District or, the USDA-Natural Resources Conservation Service for an appointment. Both agencies can be reached at 307-367-2257.

Drip Irrigation Systems for Supplemental Water Protect Your Investment

Supplemental water will be necessary for at least 3-5 years while plants establish. Installing a drip irrigation system is a highly recommended moisture conservation technique to help ensure optimum plant growth and deep root establishment. Listed below are some of the benefits of using a drip irrigation system.

- 1) Only a small area of soil near the plant is wetted.
- 2) Very little water is lost to evaporation.
- 3) Plants aren't stressed by the too-wet, too-dry cycle of other methods.

Land Preparation and Spacing

The land should be cultivated and fallowed in the fall prior to planting the windbreak. Weed control of the planting is a must operation to maintain survival. For lasting performance, better protection and greater aesthetic value, two or more rows should be evergreen species.

Farmstead protection requires 3 or more rows of shrubs and trees. Field protection can be obtained with 1-3 rows of shrubs and trees with proper design and protection.

Spacing between rows should be at least 8 feet wider than the cultivation equipment to be used, usually 12' to 16' for irrigated land and 20' for dry land.

Spacing in the rows varies with the species. For small to medium shrubs - 2' to 4', tall shrubs - 4' to 6', small to medium trees - 8' to 10', medium to tall trees - 10' to 14', pines and spruce - 12' to 14', and junipers - 6' to 8'. A tight row of deciduous shrubs on the windward side is desirable to trap snow in the windbreak.

Bareroot Trees -bundles of 25/species Deciduous - 10" - 30" top height						
SPECIES	Details	Wildlife Value	Elevation	# of lots	Cost/25	TOTAL
01 Caragana	good salt & alkaline tolerance, yellow spring flowers	good: song birds	9,500		\$ 30.00	
02 Cotoneaster	good alkaline tolerance, brilliant red/orange fall foliage	high: birds	9,500		\$ 30.00	
04 Chokecherry	good alkaline tolerance, edible fruit (poisonous to livestock)	good: birds & wildlife	9,000		\$ 30.00	
06 Native Plum	good alkaline tolerance, edible fruit, large white flowers	excellent: browse	8,000		\$ 30.00	
07 Sumac	excellent alkaline tolerance, red/orange fall foliage	excellent: birds	8,000		\$ 30.00	
09 Nanking Cherry	good alkaline tolerance, edible fruit, white flowers	excellent: birds	8,000		\$ 30.00	
12 Buffaloberry	tolerates alkaline, edible fruit for jellies (proven in sandy soils)	good: birds	7,500		\$ 30.00	
17 Red-osier Dogwood	moist soils, no dense clays, showy white flowers	excellent: birds	11,000		\$ 30.00	
18 N.M. Privet (foresteria)	moist, alkaline tolerant, yellow flowers	good: birds	7,500		\$ 30.00	
23 Native Willow Mix	moist soils-mixture of Whiplash, Strapleaf & Coyote willows	excellent: browse	9,500		\$ 30.00	
24 Golden Willow	tolerates moist alkaline soils, suckers & spreads	moderate: browse	8,000		\$ 30.00	
30 Bur Oak	tolerates alkaline well, very slow growth rate	excellent: birds	7,000		\$ 30.00	
MT Hackberry	good alkaline tolerance, rapid growth	low value	7,000		\$ 30.00	
MT Serviceberry	moist soils, showy pink flowers	excellent: browse	9,000		\$ 30.00	
MT Snowberry	good alkaline tolerance, white fruit	excellent: browse & cover	9,500		\$ 30.00	
MT Flowering Crab	clay to sandy clay soils, tolerates alkaline	excellent: birds	8,000		\$ 30.00	
MT Lilac	good alkaline tolerance, fragrant purple or white flowers	moderate: birds	8,000		\$ 30.00	
MT Woods Rose	moist soils, showy pink flowers	excellent: browse	10,000		\$ 30.00	
<div> <div>Large Tube Containers 5-12" top height</div> <div>*Large Cell Styrofoam Blocks</div> <div>Lots of 30/species</div> </div> <div>**Small Tube Containers 3-6" top height</div>						
SPECIES	Details	Wildlife Value	Elevation	# of lots	Cost/30	TOTAL
*200 Aspen	tolerates alkaline well-yellow fall foliage	high: browse	11,000		\$ 80.00	
202 Colorado Blue Spruce	moist soils, fairly drought tolerant when established	small wildlife cover	9,500		\$ 80.00	
203 Douglas Fir	excellent drought & cold resistant	high: browse	9,000		\$ 80.00	
204 Englemann Spruce	excellent cold hardiness	good: browse	8-11,000		\$ 80.00	
209 Rocky Mountain Juniper	excellent alkaline soils tolerance	high: birds	9,000		\$ 80.00	
*213 Narrowleaf Cottonwood	excellent alkaline soils tolerance, yellow fall foliage	moderate: birds	9,500		\$ 80.00	
216 Coyote Willow	moist soils, shrubby, suckering habit quickly forms thickets	excellent browse	9,500		\$ 80.00	
**304 Lodgepole Pine	good alkaline, excellent cold hardiness	good: browse	above 6,000		\$ 69.00	
Fabric Weed Barrier & Sun/Wind Guards						
				#	each	TOTAL
4' X 300' roll	fabric weed barrier by the roll				\$70.00	
4' X 4' squares	fabric weed barrier squares center of each square is pre-cut with and X opening for the tree				\$4.00	
Sun/Wind Guards	2 sided tree guards provide protection to conifer seedlings from hash sun & wind conditions				\$4.00
